

Have you bought the manuscript but never got around to trying the Alchemies?

Maybe you started to practice it but lost steam for one reason or another and want to start again?

You have been trying to do it but would love some support?

This is a practice group for The Alchemies of Horus for Lanaudière

Although, no one is permitted to teach this technology, because it is purposely precisely described in this text, I have practiced it for the last 14 years and found it to be Life Changing as nothing else has. One comes to know the Higher Self and experiences Ecstasy, which we learn to direct for healing.

Within a group setting

- You will be given the chance and time to practice this amazing Inner Technology

- You will have the opportunity to share questions to those who have practiced it
- You will have the benefit of a group energy container to help hold your focus and concentration while navigating the steps

-

It is important to understand that one needs to have read the text and have the desire to practice it. There will be NO TEACHING of this important document. Its information has been given flawlessly and it is within your own initiative to execute it, if you have been called to its Wisdom. However if you would like to join others in practicing the technique and giving yourself this opportunity to know your Higher Self, please jump in with us and feel the Lightning.
